ABOUT ME

- 8+ years of experience in IFS ERP development, delivering enterprise solutions across IFS Cloud (21R1-25R2) and IFS Applications (Apps 8, Apps 9, and Apps 10).
- Extensive expertise in IFS Cloud customization and configuration, including Entities, Projections, Aurena Pages, Assistants, Custom Objects, Workflows, Lobbies, Custom Fields, Reports, and REST APIs.
- Strong experience in IFS Cloud Release Updates (RU) and Service Updates (SU), including impact analysis, uplift, merge analysis, deployment, regression testing, and production support.
- Proven experience leading technical delivery for IFS implementation, upgrade, and enhancement projects across multiple European customers.
- Expert in Oracle PL/SQL, Aurena (Marble Language), REST APIs, IFS Connect, and integration development with external enterprise systems.
- Experienced in developing custom reports using IFS Report Designer, IFS Business Reporter, and SAP Crystal Reports.
- Strong expertise in IFS MWO development, delivering custom offline and online solutions for Service Requests, Work Orders, Tasks, Measurements, Assistants, Operational Reports, Synchronisation Rules, and Mobile UI enhancements.
- Extensive experience in IFS Advanced Forms development, including custom forms, events, validations, PL/SQL logic, data sources, reporting integration, and deployment across multiple customer implementations.
- Strong knowledge of IFS Applications architecture, Layered Application Architecture (LAA), custom object development, security, and performance optimisation.
- Proficient with Azure DevOps, Git, CI/CD, and Agile development practices throughout the software development lifecycle.
- Experienced in technical leadership, solution design, code reviews, mentoring developers, and collaborating with functional consultants and customers.
- Delivered 15+ IFS implementation, upgrade, and enhancement projects for customers across Sweden, France, the Netherlands, Poland, Germany, and other European countries.
